Lorain Port Authority

Rick,

I'd like to thank you and your org. once again for helping us with the 1888 East 31st Street property.

We plan to invest approx. \$100,000(donation made by small group) to renovate/repair the property. The garage will be turned into useable space for our food pantry and clothing closet. The main building will be used as a Community Center by ourselves and other groups to offer programs that will move people from dependence to independence.

We will be replacing the roof, windows, and either painting or siding the building along with many updates and improvements. An architect has volunteered time to help with our project also. We are still working to secure a chair lift to access all floors.

If you have any other questions please feel free to contact me.

Thanks
Bill
